In this promotion, located at “Las Higuericas” beach in Torre de la Horadada, the Swiss architect Massimo Di Caudo is looking for a division between the buildings in the longitudinal direction and between them a common access area to the garages of four of the houses. Each villa has an independent access from the surrounding streets, as there is no adjacent building. Most villas feature a plot of 319m2 and build of minimum 200m2, with possibility of various plots with larger size up to 600m2. 3 bedrooms, with possibility of 2, 4 or 5, of which, two with completed bathroom and dressing room. Fully furnished kitchen with high quality materials to choose by owner, including the appliances. Following an open concept, the dining room is surrounded with large windows, source of pleasant day light, with direct access to the swimming pool and finished gardens with illumination, irrigation and local vegetation. A microclimate is archived in all villas, extensible to each living space, thanks to its design and interior distribution, together with the thermal and acoustic insulation, obtaining a harmonic and comfortable ambient.

All this leads the villa to be sustainable and respectful with the environment. Included air conditioner (hot/cold) by conducts in all areas combined with selected finishes, using premium quality materials, customized luxury design with maximum comfort, achieving to enjoy the villa as in warm summers and soft winters, being possible to live in the whole year around.
