#### DESCRIPTION

The heart of the villa is a large living room that opens onto a magnificent porch, which turns into a charming summer lounge and which in turn connects the house with the terrace, swimming pool and the independent gym floor and guests . The kitchen is next to the living room and also has direct access to the terrace, through a small porch. The kitchen furniture has been chosen in high gloss lacquer with integrated handle, on the opposite side of the living room is the master bedroom with en-suit bathroom and dressing room; a location designed to have access to the terrace and to contemplate the sea. On this floor we find another three bedrooms with large fitted wardrobes and a bathroom to share; toilet for visitors, a laundry and ironing room and a large garage with access from the house. The terrace is a continuous space that communicates the different areas of the house, creating attractive porches, reserved terraces and charming garden areas. On the ground floor we discover a machine room, jacuzzi with sea views, sauna, bathroom with shower, as well as one more bedroom with bathroom en suite ideal to be used as a guest bedroom. On the right wing we find the terrace of the house with the pool and barbecue area with large kitchen, bathroom, storage room and a large porch with magnificent sea views. The pool of this house is

spectacular, an overflowing pool whose water surface visually unites with that of the Mediterranean sea.
